🐙 github.com/aliuair00 | 🌐 Portfolio | 📍 Lahore, Pakistan

Professional Summary

MERN Stack Developer with hands-on professional experience building scalable full-stack web applications using React, Next.js, Node.js, Express, MongoDB, and Prisma ORM. Delivered real-world projects featuring JWT authentication, role-based access control, subscription payments, media uploads via Cloudinary, and automated notifications. Experienced with Docker containerization and clean, maintainable code practices.

Professional Experience

MERN Stack Developer (Internship)

Dec 2025 – Mar 2026

Iifa Tech

Lahore, Pakistan

- Assisted in building and maintaining 2+ full-stack web applications using the MERN stack (MongoDB, Express, React, Node.js).
- Developed and enhanced frontend components in React and built backend REST APIs using Node.js and Express.
- Implemented JWT-based authentication and role-based access control (RBAC) to secure application routes and user data.
- Designed and optimized MongoDB schemas, handled CRUD operations, and improved query performance by restructuring indexes.

Projects

Tuition Institute Management System | 🐙 GitHub | 🌐 Live

- Built a role-based management platform supporting 3 user roles (Admin, Teacher, Student) with class scheduling, attendance tracking, and online exam modules.
- Implemented fee handling system, course uploads via Cloudinary, and automated email notifications.
- Tech:** React, Node.js, Express, MongoDB, JWT, Cloudinary

Gym Management System (FitPulse) | 🐙 GitHub | 🌐 Live

- Developed a full-stack fitness management platform with role-based access for Admin, Trainer, and Member roles.
- Integrated subscription payment system, workout plan management, attendance tracking, and automated notifications.
- Tech:** React, Node.js, Express, MongoDB, JWT

NeedStack AI | 🐙 GitHub | 🌐 Live

- Developed a full-stack AI platform that automatically clusters similar user-reported problems using Sentence Transformers and Scikit-Learn, helping developers prioritize and resolve high-impact issues faster.
- Implemented role-based access control with distinct dashboards and workflows for Users, Developers, and Admins, along with real-time messaging via WebSockets and a live notifications system.
- Built interactive analytics for visualizing problem trends, cluster confidence scores, and resolution rates; secured backend with JWT authentication, bcrypt hashing, rate limiting, and CORS middleware.
- Tech:** Next.js 15, React 19, Tailwind CSS v4, FastAPI, MongoDB (Motor), Sentence Transformers, Scikit-Learn, JWT, WebSockets

Technical Skills

Frontend: React.js, Next.js, HTML5, CSS3, JavaScript (ES6+), Tailwind CSS, GSAP

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases & ORM: MongoDB, Mongoose, Prisma ORM

DevOps & Tools: Docker, Git, GitHub, Cloudinary, Postman

Concepts: OOP, Software Design & Architecture, Agile, Role-Based Access Control (RBAC)

Currently Learning: TypeScript, Redux Toolkit

Education

COMSATS University Islamabad

2021 – 2025

Bachelor of Science in Computer Science (BSCS)

Certifications

Full Stack Development Virtual Internship – Apexcify Technologies (Nov 2025 – Dec 2025)

Front-End Web Development Course – EVS (2021)
